

The Carbon Chronicle

Authorized as Second Class Mail, Post Office Department, Ottawa

VOLUME 31: No. 17

ACME, ALBERTA, THURSDAY, MAY 1st, 1952

\$2.00 a Year; 5c a Copy

Mrs. C.H. Nash is spending a couple of days at her home in Carbon.

Mrs. Harry Dodyky of Calgary was a Carbon visitor for a couple of days this past week.

Mrs. Emil Rempfer has returned after having a very serious operation and a long stay in a Calgary hospital.

Mr. Emil Ohlhauser had the misfortune to break his arm at the start of combining, which has made it very bad indeed.

Mr. Gus Burger of Wayne Old Peoples' Home is visiting old friends and neighbors for a few days. He reports a grand home and grand people.

Rev. and Mrs. Hotchkis and Mrs. Jack Barr to attend the special services installing Rt. Rev. Calvert as Bishop of the Diocese of Calgary.

Mr. and Mrs. Frank Sherring returned Friday from their recent holiday in England. They were accompanied on their return by Mrs. Sherring's mother and her aunt.

Cards of Thanks

We wish to thank all who kindly helped to move our furniture and children safely while the flood waters were quite high and things looked very bad, but in a few minutes we were moved and out. Thanks again to all who so kindly assisted us.

Mr. and Mrs. Albert Bramley
30XXX30

Alex R. McTavish, R.O., Graduate Optometrist will visit Hotel Acme Monday morning, May 5 and Carbon Drug Store on Monday afternoon, May 5th. Complete dependable eyesight.

30XXX30

FOR SALE—M.M. UTS Tractor, like new. Bought new early in 1949. All ready to go to work—Apply Jim King, 7 miles north and 2 miles east of Carbon.

Diamond Engagement Rings

FRANK E. HARRIS

Church School every Saturday at 2:30 p.m.

Tree Planting Demonstrations

The rate of planting trees on our prairies is gathering momentum. Individual farmers are giving more serious attention to the growing of shelterbelts, snow fences along roadsides and more generally beautiful farmsteads. Every possible measure of support is being given to this movement by agencies responsible for tree growing.

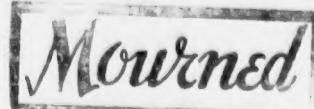

BORN—To Mr. and Mrs. John Drexler, a son, April 28th in the Drumheller Municipal Hospital.

sible for tree growing.

Greater consideration is being given to mechanical tree planters as a means of getting more trees planted at the proper time. These planters will play an increasingly important part as the tree planting movement expands. In this connection a brief reminder may be in order. Tree planting demonstrations will be held in the Municipality of Knee-hill in the near future. At the moment plans are completed for the farms of W.D. MacDonald, two miles south of Grainger; Matt. Schmaltz, two miles north of Beiseker, and L.E. Evans, four miles west of Acme on May 10, 1952 at 8 a.m., 10 a.m. and 2 p.m. respectively. Mr. F.F. Parkinson, of the Department of Agriculture will be in charge.

The deadline for receiving orders for trees to be planted in 1953 is fast approaching. Every farmer concerned is urged to get his planting plans under way for 1953 and 1954, and to get his order for trees placed accordingly. These orders should be sent to the District Agriculturist or to the Service Board of the municipality.

N.F. BELL,
District Agriculturist.

Mrs. J. Cooper

We're sorry to learn of the death of Mrs. James (Bessie) Cooper, who passed away Wednesday in Drumheller hospital. Rev. G.B. Hotchkis will conduct services in Christ Church, Carbon on Saturday at 2 p.m.

"The die has now been cast"

An American manufacturer was planning to open a plant in Canada. He considered various locations and found what seemed a likely site. He talked to a local bank manager, got facts about the community and its facilities.

Some time later the company wrote to the banker:

"The die has now been cast. It is our intention to locate in S... We feel that it is well suited to our particular operation. You have been of great aid to us. Your accurate and rapid presentation of facts necessary to reach a decision was top-notch."

Such letters show how a branch bank serves not only its own depositors and other customers but how, by assisting business development, it benefits the whole community.

This advertisement, based on an actual letter, is presented here by

UNEMPLOYMENT INSURANCE BOOKS MUST BE RENEWED

EMPLOYERS!—Please send all unemployment insurance books for 1951-52 and previous years immediately to the National Employment Office with which you deal, unless renewal arrangements have already been made. They must be exchanged for new books.

Before sending in your 1951-52 insurance books, make note of the date to which stamps are affixed, so as to avoid duplication in the new books.

Renewal of books is important to you, to your employees and to the Commission. Please Act Promptly.

TO THE INSURED WORKER!—Have you an insurance book in your possession? If so, please take or send it to the nearest National Employment Office for renewal immediately. If you send your book, enclose your present address so that your new book may be sent to you promptly.

Population Of Sask., Manitoba Electoral Districts

OTTAWA.—Only three of Saskatchewan's 20 electoral districts—Regina, Saskatoon and Moose Mountain—had more people in them in 1951 than in 1941, according to Dominion bureau of statistics census figures released.

Following are the 1951 figures for each district, with 1941 population in brackets:

Assiniboia, 39,917 (44,355); Humboldt, 46,050 (48,066); Kindersley, 34,325 (41,068); Lake Centre, 35,940 (42,993); Mackenzie, 42,200 (45,797); Maple Creek, 32,511 (43,414); Meadow Lake, 35,298 (41,458); Melfort, 44,559 (46,438); Melville, 39,995 (42,687); Moose Jaw, 42,418 (42,439); Moose Mountain, 42,647 (41,414); Prince Albert, 46,936 (46,969); Qu'Appelle, 42,235 (42,706); Regina city, 66,039 (58,245); Rosetown-Biggar, 33,033 (40,964); Rosthern, 34,173 (42,809); Saskatoon, 58,041 (47,609); Swift Current, 33,472 (42,601); The Battlefords, 40,676 (44,382); Yorkton, 44,263 (49,578).

Nine of Manitoba's 16 electoral districts showed an increase in population in 1951 over 1941, while seven showed a decrease, according to Dominion bureau of statistics census figures released.

Generally speaking, rural districts showed a drop, urban districts an increase.

Following are the 1951 census figures for each district, with 1941 figures in brackets:

Brandon, 48,486 (41,725); Churchill, 46,848 (39,042); Dauphin, 40,186 (43,585); Lisgar, 44,555 (46,833); Marquette, 36,653 (40,165); Norquay, 39,767 (42,445); Portage-Neepawa, 43,511 (43,286); Provencher, 34,220 (38,169); St. Boniface, 45,697 (37,686); Selkirk, 59,303 (45,765); Souris, 25,

Handy, thrifty, delicious! "SALADA" TEA BAGS

Flaky COFFEE CAKES

● These toothsome Flaky Coffee Cakes are a sample of the superb results you get with new Fleischmann's Fast Rising Dry Yeast! No more anxiety about yeast cakes that stale and weaken! Fleischmann's new Dry Yeast keeps full strength, fast-acting without refrigeration—get a month's supply!

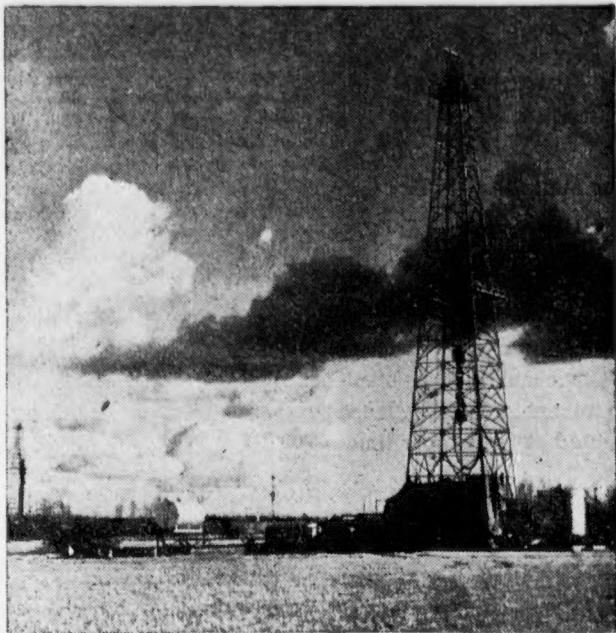

FLAKY COFFEE CAKES

● Scald $\frac{2}{3}$ c. cream, 2 tbs. granulated sugar, 1 tsp. salt and $\frac{3}{4}$ c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl $1\frac{1}{2}$ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Add cooled cream mixture and stir in 3 well-beaten eggs. Stir in 2 c. once-sifted bread flour; beat until smooth. Work in $2\frac{1}{2}$ c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Mix $\frac{3}{4}$ c. granulated sugar and 2 tps. ground cinnamon; sprinkle half of this mixture on baking board. Divide dough into 2 equal portions and turn out one portion onto prepared board. Roll out into a 12" square; fold from back to front and from one side to the other. Repeat rolling and folding 3 more times, flouring board lightly if it becomes sticky. Seal edges of folded dough and place in a greased 8" square cake pan and pat out to fit the pan; butter top lightly and press walnut halves well into the dough. Sprinkle remaining sugar and cinnamon mixture on board and treat second portion of dough same as first portion. Cover and let rise until doubled in bulk. Bake in a moderate oven, 350°, 15 mins., while preparing the following syrup; simmer together for 5 mins., 1 c. granulated sugar, $1\frac{1}{2}$ tps. grated orange rind, $\frac{1}{4}$ c. butter or margarine and $\frac{1}{4}$ c. orange juice. Quickly pour hot syrup over the 2 partially-baked cakes and bake cakes about 15 mins. longer. Stand baked cakes on cake coolers for 20 minutes, then loosen edges and gently shake from pans.

Investors Show Confidence In Oil

Canadian and foreign investors are reaping profits from the prairie oil boom. A stockbrokers' survey of the past two months reveals an increase in prices of a number of western oil shares of as much as 100 per cent. Most of the trading was done in the lower-priced stocks, though most of the higher listings have climbed. Brokers say the active market is due to the fact that investors are just beginning to have confidence in the continued production of the prairie oilfields.—Central Press Canadian.

705 (27,240); Springfield, 47,459 (44,918); Winnipeg North, 71,620 (66,239); Winnipeg North Centre, 65,523 (64,210); Winnipeg South, 75,652 (54,734); Winnipeg South Centre, 51,356 (53,702).

Do You Know That...

Canada has more lakes and inland waters than any other country in the world.

HEALTH IMPROVEMENT

Deaths from pneumonia in Canada in 1950 totalled 4,633, compared with an average of 8,039 in the years from 1926 to 1930.

Funny and Otherwise

Embarrassed Gentleman: "I want a corset for my wife."

Helpful Saleslady: "What bust?"

Embarrassed Gentleman: "Nothing, Ma'am. It just wore out."

Early to bed,
Early to rise,
Till you make enough cash
To do otherwise.

The man had bought a prefabricated house and put it together himself. With pride, he was showing it to some friends. "What puzzles me, though," he said, "is that when I go down into the basement, I come out on the roof."

"No wonder," snorted one of his friends. "You've got it upside down."

A doctor asked the woman patient her age.

"I never tell anyone my age," she answered coyly. "But, as a matter of fact, I've just reached twenty-one."

"Indeed," said the doctor, "what detained you?"

After the service one Sunday morning the vicar was approached by an old lady who expressed appreciation of his sermon. "Why, Vicar," she said, "you can never know what your sermon meant to me. It was just like water to a drowning man."

The teacher asked Charlie, "Is the world round?"

"No'm" was the short reply.

"It isn't!" exclaimed the teacher. "Well, then, Charlie, is it flat?"

"No'm," was Charlie's reply a second time.

"Well," said the teacher with a smile, "if the world isn't round and it isn't flat, then tell me, what is it?"

Charlie looked confident as he replied, "Dad says it's crooked."

Who was it said: The trouble with some men who claim to be self-made is that they knocked off work too early in the operation.

There is one thing about baldness. It's neat.

Local Lumber Merchant An Asset To Your Community

Consult Him To Solve Your Building and Repair Problems

In the small office of a rural lumber yard this spring, an elderly man and his wife were bent over the desk of the yard manager, comparing a rough sketch of their own making with several in an illustrated house plan book spread out before them. The man was a farmer, about to retire and leave the homestead for his son to run.

He and his wife wanted something of a dream house for themselves in town. What they had in mind was a modern ranch-type house with big windows. But they shouldn't be too extravagant, they told the lumber merchant, and for economy's sake they wanted a flat roof. They understood it would cost them less than the usual cottage-type shingle roof.

The lumber merchant, in shirt sleeves and his hat thrown hurriedly on top of a filing cabinet, reached into a drawer for his rough estimate of their total cost and bill of materials, compiled from a previous conversation on the matter.

The flat roof was possible, he told them, but they were wrong about economy in the long run. True, the initial cost of a flat roof was slightly less than the usual hipped roof and it gave somewhat higher rooms, but cost of upkeep was likely to be higher.

The plans they were turning over were contained in a big illustrated book detailing sketches on tap in a stock plan service provided by the Western Retail Lumbermen's Association.

The lumber merchant was a member of the association and like yard managers from the head of the Great Lakes to the Pacific coast, he availed himself of its plan service.

It is part of the job of a lumber merchant to act as building consultant and architect to communities lacking a professional in the business.

For this reason the association backs him with a drafting service which on a mail-order basis can supply building plans or answer any question on construction. Where the lumber merchant hasn't the answer to a highly technical problem or wants assurance that his information is correct, he gets it from the association's draftsmen.

Chief architect of the drafting service is T. H. Greenway whose office in Winnipeg puts out books of prepared plans available by quoting a number and paying a moderate price for anything from a community hall, hangar or home to a chicken coop, hog house or grandstand.

Largest percentage of all requests comes from rural areas where a resident architect is a rarity. The association helps meet this need not only with its stock plan service but with special plans and general building information.

It fills economically what would otherwise be an important gap in many areas.

Building is now at a high level. In this post-war period of prosperity, there is much remodeling and replacement being done on homes occupied, in many cases, by the third generation of a family. Modernization, a lot of repair and building, called for by constant wear and tear over a long period of years, had to go by the board during depression and war. Prosperity and peace have now made this work possible and many new homes, farm and community buildings are being erected.

Lloydminster Oil Production Rises

EDMONTON. — The Lloydminster heavy crude field straddling the Alberta-Saskatchewan border produced 22,000 barrels of oil more in January and February this year than in the first two months of last year.

Daily average production for the two months this year was 6,297 barrels. Total output was 377,837 barrels.

Of this total, Saskatchewan-side wells yielded 198,863 barrels or 3,314 daily while Alberta wells accounted for 178,974 barrels or 2,983 daily.

Out of this new construction, certain trends are emerging in plans requested of the association:

● More consideration is being given landscape and outward appearance of the home.

● Implement sheds are going up where there were none in the early 1900's. Fewer farmers leave implements in the field to rust and dry out in heavy weather. Since the war, demand for shed plans has been steadily increasing. One of the most popular put out by the association, is a good-sized shed which includes a garage for the family car, a workshop where machinery repairs can be made during slack seasons, a section for combine or separator plus storage space for other machinery.

● Electrification has led to considerable remodeling in the interiors of homes and barns. When a farmer decides to remodel his home in a newly-electrified area, he often asks that provision be made in his plan for electrical outlets, bathrooms and complete modern plumbing. Plumbing and electricity are also required for barns. Piping eliminates the tedious job of carting water in pails or herding stock out to a well.

● Other signs of changing times include requests for hangar plans from ranchers and farmers using light planes to get around their property.

The association's drafting office rarely sees its clients. "In a good many cases," says Mr. Greenway, "we don't even know their names." This is because the request for plan or information comes from the lumber merchant on behalf of his customer.

"Regardless of the fact we don't know the person who is going to live in the house we plan," says Mr. Greenway, "we take a definite interest in him and plan so that he will get the greatest possible satisfaction out of living in it."

"We are constantly working over plans in which we try to visualize how living in a house will be, making suitable arrangements of windows and rooms to provide the greatest comfort."

Every week into the association's office come queries from lumber merchants for technical information. The answers are passed along to customers whose construction problems have instituted them. The association maintains a technical library on construction and keeps structural design tables that give proper measures for beams, posts, joists, rafters.

The chief architect himself attends yearly short courses on newest building research at the University of Illinois.

The drafting office has been operating for more than 40 years, answering questions on construction, drawing up plans for major town and farm buildings across the west and as far north as Yellowknife, N.W.T.

(This is the third article in a series of five on the services of the retail lumber merchant to western Canadian communities.)

Cumulative output from the region to the end of February totalled 9,596,867 barrels, of which 5,406,661 came from Saskatchewan and 4,190,206 from Alberta.

Head Hunters Track Reds

Malayan Communists Learn To Fear Borneo Auxiliaries

By CAPT. REV. D. WHITEFORD
Chaplain to the Scots Guards

Head hunters from British North Borneo are leading United Kingdom patrols in the Malayan jungle to ferret out the Communist bandits who have been terrorizing the country for more than three years.

As chaplain to the famous Scots Guards I have seen how these pigmy men can often fight a jungle war with their blow pipes better than a modern army with its technological equipment. During the last three years I have been out with them stalking Communists in the jungle.

When we saw the shrunken heads which they carried tied to their belts we treated them with somewhat nervous respect. They were head-hunters, and we were taking no chances. But as soon as they had gotten over their air-sickness, we found they were friendly and cheerful little men.

In camp they would wear merely their lion cloths and keep their long black hair hanging down to their waists. However, in the jungle they donned the normal jungle green uniform that all soldiers wore, and tied their hair into a tight ball under their green deerstalker hats. Very formidable warriors they looked and were.

They are usually in front of our patrols which hack their way through the green world of the jungle, where every leaf and branch may conceal a Communist bandit.

These Dyak trackers saved us endless time and trouble in the jungle, and we quickly learned to rely on and trust their judgment.

At the head of the patrol, the Dyak would freeze against the undergrowth. He would signal back silently that there were enemies farther up the track. He had sensed them, or detected them, or smelt them out.

We never quite knew how he did it. Had he some secret radar set in his head that told him these things? We never knew. However, we did know that he saved our lives by his skill and knowledge.

We discovered this also; that if he lived too close to western civilization for too long, he lost this art. The reverse process would happen within us, if we lived too long away from the modern world. We had to learn to march with them in their own way.

GEMS OF THOUGHT

LIVING SONG

Music must take rank as the highest of the fine arts — as the one which, more than any other, ministers to human welfare. — Herbert Spencer.

Music is divine. Mind, not matter, makes music; and if the divine tone be lacking, the human tone has no melody for me. — Mary Baker Eddy.

Music is a discipline, and a mistress of order and good manners, she makes the people milder and gentler, more moral and more reasonable. — Martin Luther.

Music resembles poetry; in each are numerous graces which no methods teach, and which a master hand alone can reach. — Pope.

All music is what awakes from you when you are reminded by the instruments. — Walt Whitman.

HERE'S HEALTH

Fear of the dark is real enough.

It's no annoying childish bluff.

Love and reassurance kind

Will help to soothe the troubled mind.

Dept. of National Health and Welfare

Scots Guard sergeant teaches Dyak tracker use of rifle in jungle fighting. — Central Press Canadian.

These Dyaks were primitive, superstitious men. Some days, unless the omens were favorable, the tracker would refuse to go out on patrol, and his place would have to be taken by one of his friends. He might have had bad dreams. That was an ill omen.

The signs which he read in the clouds, or the shadows of the trees might be against him. He would fall sick if the omens continued to be set against him over a period of weeks. We would have to pack him off to his own Dyak centre where things were put right. He then returned after religious ceremonies, cheerful and ready for duty as before.

They possess implicit faith in their magic charms as a protection against the enemy bullets. Little bags of bones and twigs and stones, which guarantee them complete immunity, always hang from the belt at their waist.

They were never without their prized possessions, they explained to us, even their family heads; small, wizened, dried-up looking objects that resembled small black coconuts, but on closer investigation turned out to be human heads.

These were the heirlooms handed down from father to son from days long past, and proved the quality and fighting strain from which the owner was descended. They looked on them as we would medals and international cups.

It says much for their skill that very few of these men have lost their lives. They are so alert to the danger of the jungle that it is usually the Communists, and not us, who are surprised.

The bandits are very scared of the headhunters. Captured Communists have told us of the wild stories that go around in the Red ranks — of Communists heads cut off and strung up at the belts of the little men from Borneo.

Of course no such thing ever takes place. The Dyaks have long ago given up the practice of cutting off their enemies' heads, but they do like to carry their family "heirlooms" of heads, dried and shrunken by their forefathers after victory!

The tragedy of tragedies with

these primitive men was the loss of faith. One of our trackers was slightly wounded in a battle with the terrorists. He was soon patched up by the doctors and returned from the army hospital to outward appearances fit and well.

However, a terrible battle was raging in this tracker's mind. He had been wounded, therefore his charm had failed. He was without the protection of their magic. The spirits were against him. His friends explained all this to us "and there was nothing" they said, "they could do to help him." He was of no use to us.

There is a happy postscript to the story of the headhunters. When they get back to their own land they present their prized Guardsmen's caps to their wives — the headhunters are polygamous.

One of the first things our pigmy friends do is to buy a camera and photograph their handsome little wives proudly wearing the caps. The girls look strange but charming, for they are naked to the waist.

The Dyaks send us the photos as a souvenir of friendship, and, of course, the Guardsmen pin up the photos over the bunks — surely the strangest pin-up photos of any war!

Doctors Have Good Alibi For Snoring

LONDON. — Medical science has come up with a solid alibi for the chronic snorer. The whistling and trumpeting is nothing but nature's way of signalling that the system's blood supply is being recharged with oxygen and as long as the sleeper is snoring all is well.

The theory is advanced by Dr. J. W. Lovett Doust and Dr. Robert A. Schneider, Medical Fellows of the Nuffield Foundation, after a series of nightly vigils over seven sleepers ranging in age between 22 and 36 years. Their conclusions were published in the British Medical Journal.

Enough heat is given off daily by the average man working at an average job to raise seven and a half gallons of water from freezing to boiling point.

On The Side : By E. V. Durling

People born under the sign of Sagittarius have a great talent for picking the winners of horse races. Or so say the stargazers. That is one of the statements of the stargazers that inspires me to keep an open mind on astrology. My girl friend was born under Sagittarius and the way she picks those longshots out of the air is uncanny. Why, sir, she picked "Miche" to win the Santa Anita Handicap!

"St. Patrick Is Responsible"

"That the Irish bachelors are the most difficult to get into matrimonial harness of any single men in the world is unquestionably a fact," writes a feminine subscriber. "I know. I lived in Ireland until I was twenty-eight and, though considered passing fair, could not make any bachelor break down and propose. I was married two months after I arrived in New York. Irish bachelors have always been hard to get. As you no doubt know, the idea of women proposing during Leap Year originated in Ireland. St. Patrick was the originator. His inspiration, however, came from a conversation with St. Bridget, who said the women were complaining it was so hard to get men to propose."

Afraid of the Dark

Harry Greb was one of the most courageous fellows ever to step into a ring, yet he was afraid to sleep in the dark. Always kept the lights on. He also was afraid of dentists. He loved to fight. During one period of his career he had at least one bout every week. He nearly always bet his end of the purse on the outcome of the fight. From all the purses of his important fights he gave \$500 to the Church of Immaculate Conception in Pittsburgh. Harry was thirty-one years old and had only one eye when he staged one of the greatest battles of his career with Mickey Walker in 1925. Greb was not, as is generally supposed, a heavy drinker. He often staged fake wild parties before important bouts to give the opposition the idea he wasn't training and wouldn't be in good shape for the fight.

The Right Girl

Forty-four-year-old Dr. John T. Williamson, the world's richest bachelor, still appears to be fancy free. Says he is waiting for the right girl. Dr. Williamson, owner of the world's most productive diamond mine, lives in Tanganyika. That's not so hard to reach for those who travel by air. Don't know exactly how much money this highly eligible bachelor possesses, but his mines turn out from fifteen to twenty-five million dollars' worth of diamonds annually.

Overweight People Prone To Cancer

—SAYS SPECIALIST

CHICAGO. — Keeping slim apparently is some insurance against getting cancer. Overweight people are more prone to cancer and other diseases than normal weights, life insurance figures show.

The picture was described to newspaper men on an American cancer society tour by Dr. Albert Tanenbaum of the department of cancer research, medical research institute, Michael Reese hospital.

The abundant diet, especially in calories, seems to make it easier for cancers to start, he said. Food doesn't cause cancer, but it may modify or influence the cancer process.

Cancers take longer to appear when animals eat diets below the accepted health minimums in calories, fat, protein, vitamins and minerals. But if humans don't get enough energy foods, vitamins or other things, they become prey to other disease, especially infections.

So the best bet seems to be a good balanced diet designed to keep normal weight for your own height, build, and age.

Once cancer has started, diets to lose weight are bad. Cancers tend to rob the rest of the body of foods, and insufficient diet hurts general health all the more.

—Central Press Canadian.
CO-OPERATION — Members of a U.N. tank company go to work on one of their vehicles after shooting up a Communist bunker in Korea. This system works fine when the man on top is light in weight and the man below is tall.

Spring Tonic For Chrysanthemums

Hardy chrysanthemums should be divided each Spring since old clumps gradually produce inferior blooms.

Root divisions of "mums" act as a Spring tonic, for the plants are rank feeders and quickly exhaust the food in the soil. When this happens the growth becomes weaker, the blossoms smaller, and the plants become more susceptible to the attacks of insects and disease.

When the young shoots appear in the Spring, separate those from the outside of the clump which have ample roots. Plant such divisions in freshly enriched soil.

Each division should have but one stem. This is called single division. The single-shoot type of division also makes it possible to produce many more plants from one clump. These divisions will produce flowers in the Fall.

If the new divisions are to be grown in the same area from which the old clumps were taken, dig up the soil thoroughly. Then add rotted manure, compost or peat moss and fertilize with one of the complete commercial garden fertilizers.

Plant the divisions 18 to 24 inches apart. Firm them in well and water thoroughly at time of planting. The hard centre section of the parent plant can be used for cutting, then discarded.

Chrysanthemums also require some care and attention up to blooming time. Many plants, for example, have only one or two green leaves left at blooming time. The other leaves have withered and died on the stem. This condition is caused by a fungous disease which can be controlled by spraying with Bordeaux mixture. Begin to spray early in the season.

UNIQUE SCHEME

A policeman stopped a woman wheeling a baby-carriage in Rochdale, England, when he noticed the springs of the carriage were weighed down. In it he found 36 pounds of lead stolen from the roof of a civic building.

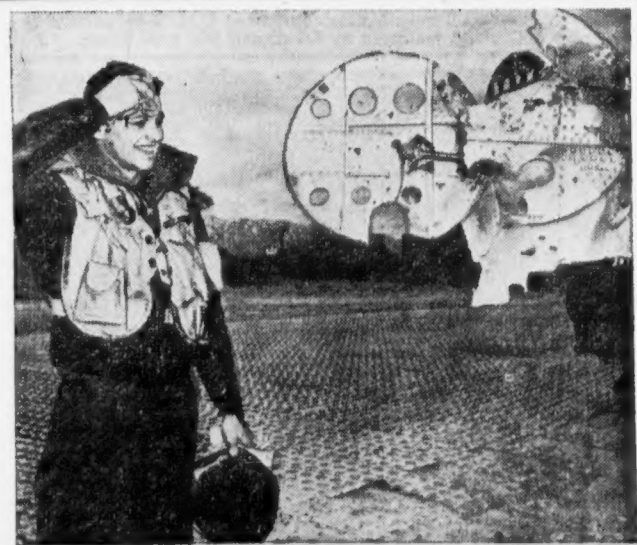

A stalactite is a mineral deposit, usually in the form of an icicle, hanging from the roof of a cave.

COURTING COUPLES BREAK MANY STREET LAMPS

SALFORD, Lancashire, England. — The Salford street lighting committee blames courting couples for breaking 1,285 street lamps since last September.

Residents reported they had seen girls and boys seeking privacy by smashing the lamps under which they were standing.

Think Right—Eat Right—Live Right

—Central Press Canadian.
NOT ONLY CATS HAVE NINE LIVES — U.S. Marine Lieut. Eugene R. Brady smiles in relief and mops his dampened brow as he surveys his battered wingtip tank after safely landing his Panther jet fighter-bomber at his base in Korea. The tank was blasted by Communist anti-aircraft shellfire while Lt. Brady was on a strike against Red rail lines. He managed to get his plane back to base without further mishap.

RUSSIA'S "INTERCONTINENTAL BOMBER"—This sketch, showing what purports to be a new Russian long-range heavy bomber, was made public in the latest issue of a U.S. air magazine. Drawn by British aviation artist John Hay Stevens from data obtained from behind the Iron Curtain, the Red bomber is seen to have six turbine-propeller engines and a swept-back wing. It is reported to have an "intercontinental range" and an operating ceiling of 50,000 feet. Prototype of the Soviet bomber reportedly made its first flight in September, 1950, after it was completed in a Ural mountains factory. Andrei Tupolev, who copied the U.S. B-29, is said to have worked with a German engineer in developing the new plane.

JAP PEACE TREATY BECOMES FACT—Almost seven years after hostilities ceased between Japan and the U.S., the peace treaty, debated for years, has finally been ratified by the U.S. Senate. Senators Tom Connally, (left), and Alexander Wiley look on as Senate Secretary Leslie Biffie affixes his signature to the pact. Canada will soon sign a similar treaty with Japan.—Central Press Canadian.

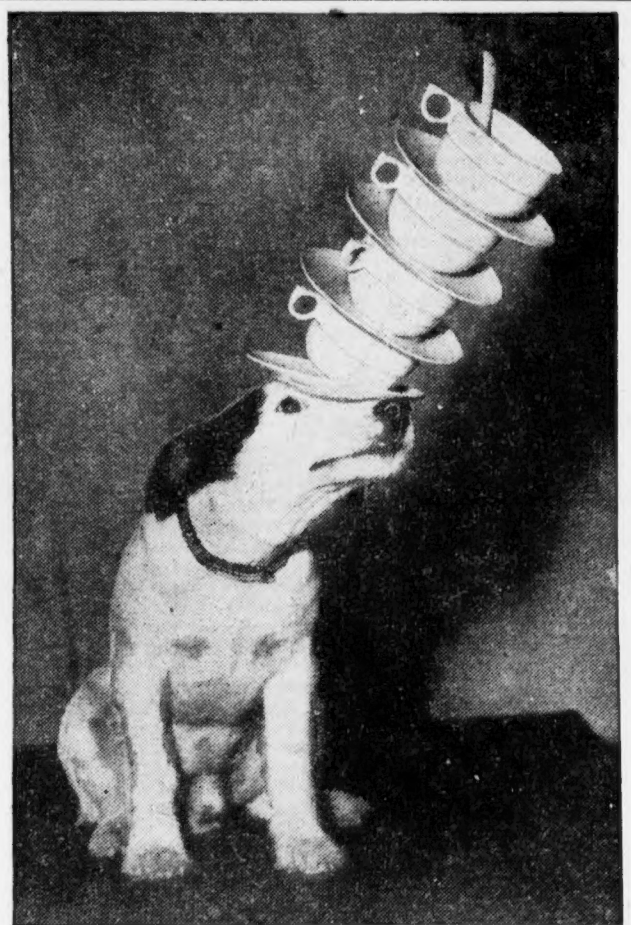

—Central Press Canadian.
IN PROTEST—Town council of Brampton, Ont., had a juvenile resolution on its hands when it enacted a by-law making it an offence to allow a dog off the owner's property except on a leash. Shirley Smith is one of the youngsters who paraded down the main street with placards demanding repeal of the law. Adults, objecting to the number of dogs on the streets, are divided on their opinions of the law.

—Central Press Canadian.
FIVE MILLION PROFIT ON \$1,000 INVESTMENT—Hyman Harvey Klein, Baltimore businessman, told tax investigators how he, with two unidentified Canadians as partners, made a five million dollar profit on a \$1,000 investment. He said that he, his brother and the two Canadians invested \$4,000 in setting up corporations in Cuba and Panama, buying and selling whisky from a Canadian concern. These Cuban and Panamanian companies made a net profit of some \$20,000,000 from April, 1944, to September, 1946. Klein sold his interest for \$5,000,000 in 1947.

Mary, Queen of Scots, was beheaded by order of Queen Elizabeth in 1587.

TOBBY, a three-year-old fox terrier, appears to be in some difficulty with his balancing act, presented for the benefit of troops in Germany. The versatile dog, according to trainer Alfons Strobl, has an understanding of 650 words and is an accomplished acrobat.

WAR CHIEF AND "TRAGIC VICTIM"—General James A. Van Fleet, U.N. commander in Korea, took time out from the grim business of running a war and went to play with the youngsters at Columba orphanage in Seoul. The general has described these orphans as among "the most tragic victims of the Korean conflict." He is experienced at playing with children, as he is a seven-time granddad.—Central Press Canadian.

The Sports Clinic

What To Emphasize During The Early Work-Outs

The main thing that should be emphasized during the start of any new season of activity is the elimination of your faults that were apparent last year. Unless you work on this principle right at the start you will hang on to your faults all through this coming season too. Right now, your body and mind are fresh and very able to develop new habits to replace the old ones, because the old habits haven't been re-established. But if activity is started without any attempt to develop new habits the old ones will come back to stay and the longer this continues the worse the bad faults will become.

This point is covered very well by Dean Cromwell, coach of the winning United States 1948 Olympic track and field team, in one of his famous sports instruction books. He said: "The athlete should try to work up to a set schedule, emphasizing his weaknesses at all times. Work should be done in front of your coach, or another athlete or friend who understands what you are trying to do, so they can advise you of your weaknesses. Remember, your weaknesses are more apparent to someone watching."

So, list the weaknesses you should eliminate and start to work on making the change over right away. Start very slowly, and train that mind and those muscles to get the feel of the new way before the pressure goes on. Try not to use the weakness under pressure until you have corrected it through slow, careful training.

Pay Attention

Study has shown that when the average athlete is being instructed by his coach or is practicing on his own, that only one in ten actually gives the job at hand his full attention. This is not slanted to mean that he is looking off into space or thinking about something else, but that he is not consciously directing his attention.

So if you want to get the most out of your practices, start the season right and direct your full attention to what you are trying to do or to

the instructions to which you are listening.

Settling Down After a Hard Practice Or Game

Having trouble relaxing and controlling those jitters after a practice or game? Try the following: go for a long walk concentrating on deep, slow breathing as soon after activity as possible. Then take a long hot bath and when in the tub try to let all your muscles go limp. These methods help eliminate the strain of fatigue and ease any nervous tension. Finally, to ease your mind regarding what you should or shouldn't have done in the game, write down any lessons you learned or resolutions you want to make about the next game.

Membership in Sports College is the only way in which you can take full advantage of the many services Sports College has to offer. So if you are interested in physical fitness, sports activity, as a player or coach or recreation in general, or perhaps as a parent interested in the welfare of their athletically minded children, take this opportunity to join. All you need do is drop us a line at: Sports College, Box 99, Toronto 1, Ontario, and say you would like to join.

World Happenings Briefly Told

Golda Goorwick of London hadn't been to the movies for five years so she decided to take her family to the local cinema. In their absence, thieves raided the house and stole goods worth \$1,000.

A necklace of 37 large pearls with a clasp of 13 diamonds, once owned by Napoleon III's consort, Empress Eugenie, was sold at an auction in London for £2,400. A jeweler bought it from the Marchioness of Bristol.

A novel type of X-ray table which permits three-dimensional photographing of the heart has been designed by a doctor and engineers at Malmo, Sweden. The new table is expected to greatly improve diagnosis for operations.

Hastings, England, the historic Sussex seaside resort plans to attract a record number of visitors this year with a tropical exhibit. The sea front will be adorned with models of banana trees, date palms and sub-tropical plants, all extensively illuminated.

Excavations on the bombed ruins of St. Bride's Church, off Fleet street in London, built by Sir Christopher Wren, have revealed the walls of three former churches dating back to the 12th century. It is believed further excavations may uncover remains of a Roman edifice.

In Japan the arrangement of flowers is considered a national art.

Saskatchewan Expects More Tourists This Year

REGINA.—Provincial officials expect a five to 10 per cent. increase in the Saskatchewan tourist traffic during the coming summer season. This would mean a record tourist year for the province.

Big drawing cards again this year will be Prince Albert national park and the far-north fishing resort at Lac la Ronge.

The latter, opened only a few years ago, will once more get all the tourists it can handle in spite of the opening of a new hotel and 20 or 30 new cabins.

Lac la Ronge has drawn many Americans because of its excellent fishing. The new resort has drawn much notice in American publications.

The province also has a number of provincial parks which will operate as usual.

HOW NAME ORIGINATED

The Name of Nome, Alaska, was suggested by Cape Nome, near which the town is situated.

Weekly Tip

CLEANING STOVE

Brown stains can be removed from the steel fittings of a stove by rubbing them with a rag dipped in vinegar. Polish afterwards in the usual manner.

Kitchen Meditations By JANE DALE

I MUST SLOW DOWN A BIT

I must slow down a bit; I'm going too fast.
I can't see the faltering one as I rush past.
I can't see the little child in need of my hand;
Nor see the broken heart, or take time to understand.

I must slow down a bit; perhaps then I'll see
The hand of another soul begging alms of me;
Perhaps then, too, I'll know the joy and grace
Of service to others who tread a slow pace.

I must slow down a bit; take time to know
The beauty of earth and sky as on I go;
Take time to listen now to a gay song
And catch each merry trill as I travel along.

I must slow down a bit, so I can live
Not just to hurry on, but to love and give
The fruit of heart and mind; the best I know.
I'll find a better life when I go slow.

HUNTING COUGARS GOOD

NANAIMO, B.C.—Seven cougars fell before the guns of Jimmie and Percy Dewart within a week. Hunting near this Vancouver Island centre, Percy bagged four and Jimmie took three.

Wine was the first intoxicating drink known. 2981

THIS CURIOUS WORLD By WILLIAM FERGUSON

OSTRICHES MUST EAT LARGE ROUGH OBJECTS TO DIGEST THEIR FOOD! BIRDS HAVE NO TEETH, SO GRIND THEIR FOOD WITH GRIT. BUT WHERE SMALL BIRDS DO THE TRICK WITH SAND AND GRAVEL, THE OSTRICH SWALLOWS ENORMOUS FOREIGN ARTICLES.

KWIZ KORNER

DOES LEAP YEAR COME EVERY FOUR YEARS WITHOUT FAIL?

BLOOD CIRCULATES ONCE AROUND THE HUMAN BODY IN ABOUT TWENTY-TWO SECONDS.

ANSWER: Not always. A year whose number is divisible by 4 is usually a leap year. If, however, the number is divisible by 100, then it must be divisible by 400 also. Thus, 1900 was not a leap year.

Answer To Last Week's Puzzle

GARDEN NOTES

Weeds And Cut Grass Make Good Fertilizer

Save It

"If it will rot, it will make good soil". The man who dumps all the weeds and cut grass into the garbage pail is actually tossing away fertilizer. All garden refuse, weeds, grass clippings, leaves, etc., will rot down into excellent soil, and so will a lot of other things if we give them a little encouragement.

Usually a corner of the garden, screened with shrubbery or something else and away from the house, is selected for this soil-making business. It is technically known as composting, and the material a compost heap. Simply select a fairly well-drained spot and here dump the leaves, weeds, grass and whatever is collected. Over this we sprinkle a layer of earth and the process is repeated each time we add some refuse. If available add some manure and possibly a little lime and commercial fertilizer. It's a good plan to soak this pile occasionally with water and also turn it over once or twice to assist decomposition. In a few months this pile will break down into first-class, rich garden soil. The process can be hastened by using some of the various patent chemicals on the market.

Forget the Handicap

There are few places where something will not grow, and certainly none in any garden or corner of the garden no matter how unpromising. The great run of flowers and vegetables, of course, prefer an open position with lots of sunlight and in a nice, rich, well-worked loam. However, in small urban gardens especially, one cannot always have the

ideal. But that does not mean that one cannot have plants, and especially flowers.

Certain flowers, like the tuberous rooted begonia, actually need a dark, shaded corner. Anything like full sun for them would be disastrous. And there are some other flowers which like varying degrees of shade. There are others, many more indeed, that prefer a little shade throughout the day. Actually full sun will often bleach out delicate coloring. Then, too, not all flowers prefer very rich soil, some, like the portulaca, like the other kind and very dry. Again there are certain flowers and a few vegetables, too, that will thrive best in soil that is slightly acid or wet, while others insist on no acid at all and a well-drained position.

All these points one takes into consideration when planning to have a garden, especially one in a rather unusual place. All these special likes and dislikes are usually mentioned in the seed catalogue. Also mentioned will be time and flowering, coloring, whether the flower is scented or not, whether it has long stems and is, therefore, suitable for bouquets.

A Short-Cut

One can set out plants two weeks to a month earlier than usual by providing some extra protection in the form of paper caps or miniature glass greenhouses. These are kept over the plants or hills until weather turns warm.

Quick Canadian Quiz

1. If you were 23 degrees, 28 minutes of latitude south of the North Pole, you'd be where?
2. Which of these explorers first visited Canada: Cartier, Cabot, Verazano, de Fuca, Champlain?
3. Canadian women use on the average how many pairs of full fashioned hosiery each year?
4. What metal is part of or is used in the processing of or manufacture of virtually everything Canadians buy?
5. How does per capita production of Canadians compare with that of Americans?

Helpful Hints

Dip a clean knitting needle in the milk for a few seconds. If the milk is pure, it will form in a large drop at the end of the needle; if watered, it will either run down quickly and drop in several small drops, or the point will appear dry and clean.

Hem the frayed edges of rugs by folding back and applying adhesive tape on the wrong side. This makes a neat hem without taking a stitch or acquiring painful sores on the fingers.

If a young mother has trouble finding sharp safety pins to go through bundles of diapers, she should try running the pin point into a bar of soap. The pin will then slide right through the folds of the diapers.

When putting snaps on a garment, first sew the half that has the peak in the center. Rub the peak with chalk and press it against the material. The resultant mark will show where to sew the other half of the snap.

Smile Of The Week

Two Southern farmers met on the road and pulled up.

"SI, I've got a mule with distemper. What'd ye give that one of yours when he had it?"

"Turpentine. Giddap!"

A week later they met again.

"Say SI, I gave my mule turpentine and it killed him."

"Killed mine too. Giddap!"

HAS SIGHTS ON THE PRESIDENCY—Senator Richard B. Russell of Georgia, who recently tossed his hat into the presidential ring as an aspirant for the Democratic nomination, is shown checking his hunting gear in his bachelor apartment in Washington. He is chairman of the Senate armed services committee.

"Do It Yourself" Garage In Montreal Goes Over Big

MONTREAL.—Peter Staruch recently opened a new "do it yourself garage" here and he says he has discovered more potential mechanics than you can shake a stick at.

The owner of the novel repair shop is a lanky ex-farmer who got used to repairing his own vehicles while working on his father's farm.

The garage is a paradise for people who like to tinker with their cars—they can wallow in grease and oil for only a fraction of the cost of having mechanics do the work at a conventional garage or service station.

Pete borrowed the idea of the garage from articles on the activities of two Chicago men who set up auto stalls, handed out tools and advice, and allowed car owners to rip their cars apart for the love of it.

All you pay for in the "do it yourself garage" is the space your car occupies. With space for 15 to 20 cars depending on what make and model they are, Pete is now taking advance reservations.

For \$2.75 a day—of 14 hours—customers draw a stall, light extensions and a box of tools. If they need jacks or other equipment all they have to do is yell.

Snakes do not have vocal chords.

ODDITIES In The News

Six women officers were added to the Mexico City police force and they won't cost the government a cent. Their salaries are being paid by a firm which has leased the backs of their uniform coats for advertising purposes.

When a man is bitten by a dog that isn't news, but when a man is bitten by his own teeth then it's a different story. That is what happened to an unnamed Esterhazy, Sask., resident recently. In anticipation of a good meal he removed his bothersome dentures and slipped them into his hip pocket, promptly forgot about them and sat down. There was a loud snap and the gentleman arose hurriedly, red of face, to remark, "that settles it, I need a new pair anyway."

Fred Bunn of London, took a special interest in a jar passed for inspection by the Jury at Old Bailey court. It contained his left ear. Joseph Cowley was sentenced to four years in prison for biting the ear off during an argument on a bus.

Mrs. Paul Napier of Wayne, W. Va., has finished the job of pulling her own teeth and now she's ready to go to the dentist for new ones. The 25-year-old woman used a pair of forceps handed down by her grandfather. She pulled 13 teeth during February and 11 in March. She thought dentists' fees for yanking were too high.

Water-Filled Bags Slow Forest Fires

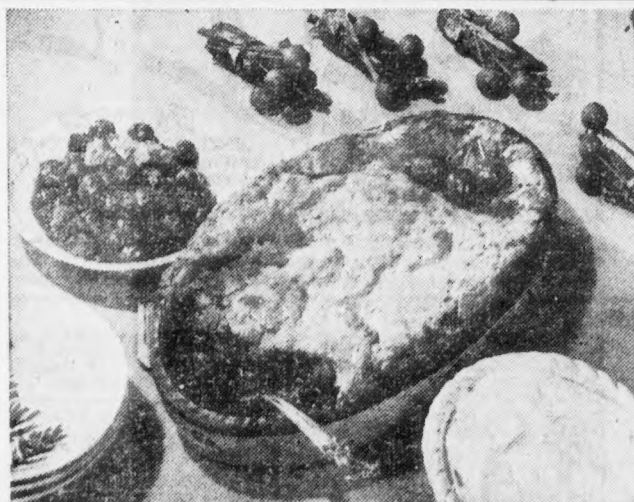

MONTREAL.—Paper bags filled with water and dropped from low-flying aircraft will slow down spreading forest fires, Q. F. Hess, district forester for the Ontario Department of Lands and Forests at Sault Ste. Marie, said.

Hess told the annual meeting of the woodlands section of the Canadian Pulp and Paper Association that his department has experimented with water bombs since 1949, and that the technique has "shown much promise."

"Specially made paper bags, holding three and a half gallons of water, are dropped on the fire from aircraft at a height of 300 feet," he said.

"On hitting the ground, they not only wet the area, but add water vapor to the air, thus retarding the advance of the fire."

: Selected Recipes :

Here's a cherry pudding with a baked-on-top crust that's different. Made with ready-to-eat bran, the crust is light and rich, to offset the tartness of the cherries.

Cherry Surprise Pudding

Two cups canned sour cherries, 1½ cups sugar, 3 tbsp. butter, ½ cup ready-to-eat bran, ¼ cup sifted flour, 1 tsp. baking powder, ¼ tsp. salt, ½ cup milk, 1 tbsp. cornstarch, ¼ tsp. salt.

Drain cherries and place on greased baking pan. Add water to juice to make 1 cupful, heat to

boiling point. Blend half the sugar to the butter, add bran. Sift baking powder and salt, add to shortening mixture alternately with milk. Mix well. Spread batter evenly over cherries. Mix remaining sugar with cornstarch and salt. Sprinkle over batter. Pour hot juice over pudding and bake in a preheated oven at 375 degrees F. about 1 hour. Yields 6 servings.

Alberta Fishing Regulations Announced

EDMONTON.—Lands and Forests Minister N. E. Tanner announced there will be no closed season this year on fishing for trout, grayling and Rocky Mountain whitefish from the international boundary north to, and including the Bow River and its tributaries.

This was one of the amendments to the Alberta fishing regulations announced by Mr. Tanner.

The regulations governing the open seasons for trout, grayling and Rocky Mountain whitefish in other Alberta waters have not been changed, and fishing in the watersheds of the Red Deer and North Saskatchewan Rivers will open May 1 and close Sept. 30.

Fishing season in the Athabasca River watershed will run from June 1 to Oct. 15. There will be no closed season in the Macleod River and its tributaries. Season for lake trout will be May 16 to Sept. 15.

A change was announced in the daily trout limit. Last year a maximum of 15 trout was allowed. This year the same number, but with a maximum of 20 pounds will be allowed.

In other words if a fisherman caught 10 trout and the total weighed 20 pounds he would not be allowed to take any more. This comprises a mixed catch of trout, grayling and Rocky Mountain whitefish or 15 of one of these species daily. Only 10 lake trout may be taken daily.

Limits of pike, pickerel, perch and goldeyes which may be caught daily were unchanged and are as follows:

Pike and pickerel, 15 fish of one species only, or 15 fish in the aggregate; perch and goldeye, 25 fish of one species only, or 25 fish in the aggregate; pike, pickerel, perch and goldeye, 25 in the aggregate.

Some waters in Southern Alberta are to be closed to fishing until further notice, Mr. Tanner said.

The waters have been closed for the natural and artificial propagation of trout. Angling posters and 1952 angling regulations have been prepared and are being distributed.

Following waters were reported closed:

The Bow River or irrigation canal flowing through the Inglewood bird sanctuary, Calgary;

The Pine (Dungarvon) and Cottonwood Creeks, tributaries to the Waterton River;

Livingstone River and that portion of the Old Man River (northwest branch) upstream from its junction with Livingstone River;

All tributaries to the downstream left bank of the Crownsnest River;

Castle River and its tributaries upstream from Castle Mount ranger station;

All tributaries to the downstream right bank of Castle River;

All waters within the southwest quarter of section 5, township 36, range west of the fifth meridian.

The fisheries branch had requested aid of fishermen in forwarding tags from all marked fish to the fisheries branch, Edmonton or to a district fish guardian.

The branch asks for details of the locality and date of capture of the fish, length, weight, sex and samples of the scales from the side of the body above the lateral side and below the dorsal fin.

All tributaries to the Elbow River; Fish Creek and its tributaries, tributary to the Bow River;

All tributaries to Jumping Pound Creek and that portion of Jumping Pound Creek upstream from its junction with Sibbald Creek;

Waiparous and Meadow Creeks, tributaries to the Ghost River;

All tributaries to the Kananaskis River;

Smuts Creek, tributary to Spray Lake;

All waters within the southwest quarter of section 5, township 36, range west of the fifth meridian.

The fisheries branch had requested aid of fishermen in forwarding tags from all marked fish to the fisheries branch, Edmonton or to a district fish guardian.

The branch asks for details of the locality and date of capture of the fish, length, weight, sex and samples of the scales from the side of the body above the lateral side and below the dorsal fin.

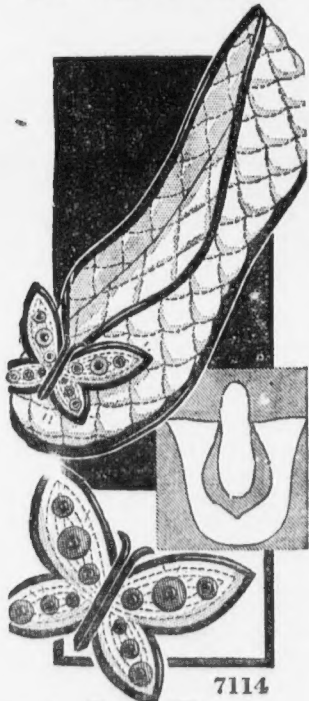

ANSWERS TO QUICK QUIZ

ANSWERS: 5. Our productivity per man-hour is about two-thirds of that in the U.S. 3. Eight. 1. At the Arctic Circle. 4. Steel. 2. John Cabot.

VIRGIL

By Len Kleis

OUR COMPLETE SHORT STORY—

For Love Of Ruth

The Deed Of An Outcast
Son To His Brother.

By Louis Arthur Cunningham

ALAN BOND, the outcast son of a good family, had picked a poor night to return to the home of his youth. Pavements glistened blackly under the street lights shrouded in fog.

But Alan had won the right to come back, won it through years of fighting . . . against the world from which he found it so hard to gain a living, against himself whom he found still more difficult to conquer. The same wildness, the old love of drink, of luxury and ease that had embittered a good but stern father's heart against him followed him out into the hinterland, dogged him so viciously that the fight he had won against them had filtered all dross from a nature that was basically good. It had made him a man, doubly strong because he had looked on evil, been floored by it and had risen to triumph.

"You may come back," his father had told him five years ago on a night like this, "but only when you can show the fruits of honest toil. I have done my best with you, but I have paid your last debt and suffered the last disgrace that I will endure."

Alan's going had been hard. The parting with his family had been bad enough, but there was another, Ruth Finley, a girl whom he adored with all his reckless heart. He left without saying good-bye. Perhaps, he thought she was better rid of him. There were plenty of decent, hard-working fellows who would think their splendid best even too poor for Ruth. With one of them she would settle down to a tranquil life. But the torn chords in Alan's heart when he went from her had never healed.

Five years since he looked at that house with its solid front of respectability! There was a choking in his breast as he walked up the drive.

Mrs. James Mason
Compares Blue Bonnet
— It's Best Seller!

Try this idea from Mrs. James Mason. Compare BLUE BONNET Margarine with any spread at any price. Like the famous actor's wife and novelist, you'll love the delicate, sunny-sweet flavor of Canada's fine-quality all vegetable margarine. You'll appreciate BLUE BONNET's nutrition. And you'll welcome its real economy. So buy BLUE BONNET and get "all 3" — Flavor! Nutrition! Economy! Use it in cooking, on vegetables, as a delicious spread. BLUE BONNET Margarine is sold in two types — regular economy package with color wafer, and also in the famous YELLOW QUIK bag for fastest, easiest color.

FALSE TEETH

That Loosen
Need Not Embarrass

Many wearers of false teeth have suffered real embarrassment because their plate dropped, slipped or wobbled at just the wrong time. Do not live in fear of this happening to you. Just sprinkle a little FASTEETH, the alkaline (non-acid) powder, on your plates. Holds false teeth more firmly, so they feel more comfortable. Does not sour. Checks "plate odor" (denture breath). Get FASTEETH at any drug store.

This was the first real joy he had known in all that time. He was coming back with the proof of his manhood . . . five thousand dollars honestly accumulated, but each dollar marked with the sweat of body and the ache of soul.

It was late. He should have waited till morning. But the desire for home had been strong.

A single light—his mother's fingers had made its shade—burned in the hall. Instinct guided his fingers to a latchkey hung as of old by the door. Everybody had retired.

His father's study. In front of the panelled door he stopped. It was there he had last seen the old man and listened to his accusations. His father had compared him to Gordon, his younger brother, and Alan had suffered in the comparison. Gordon had always been favorite. He was all that Alan was not . . . steady and serious.

Alan tried the knob. To his surprise the door opened. He had never known his father to leave it unlocked.

Inside, the light still burned. Alan stared wide-eyed at the chaos that reigned on the desk. It had been rifled. A strong-box lay open.

There was a letter in the box and beside it a scribbled note: "Father:—I had to steal your money to get away from here. I know this will break your heart that has suffered so much already from an ungrateful son, but I need it and it is the only way. Forgive me."

It was unsigned.

Alan took the letter. It was directed to Ruth Finley. The writing was better. It was Gordon's, his brother's. It read: "Dearest Ruth:—When you get this I will be far away. I am several thousands short at the bank. It will be known tomorrow. I could not bear to tell dad. He had suffered enough from Alan and I fear what the shock will do. Try to help him bear it. Forgive me. Our love was as dear to me as to you, but I could not resist the chance to win big money and I lost all. I am leaving tonight. Gordon."

Slow thinking was not one of Alan Bond's handicaps. The letter to Ruth he thrust into his pocket. With a pen he signed the message that Gordon had left—signed it with his own name—Alan. Then he left the house and ran through the deserted streets to the station.

The express was pulling in as he neared the tracks. Far down the wind-swept platform he spied a furtive figure. He ran faster and got there in time to pull his brother from the step of the train. He thrust a wallet, his wallet with the blood-sweated savings of the years, into Gordon's hands and pushed him back on the platform.

"This will help you. And keep your mouth shut about me," he said.

Then Alan Bond, outcast son of a good family, ran after the train and swung on to the last car. Some day, perhaps, he would come back . . .

LILLOOET, B.C.—A complete human skeleton encased in ice was found by workers in an old rock slide near here. It may have come down in the slide from an Indian cemetery or be a relic from the prehistoric ice age.

Aid To Mine Industry

WINNIPEG.—Moving of the town of Sherridon, Man., to its new site at Lynn Lake, 150 miles north, will prove to be a "tremendous advantage to the country's mining industry," Peebles Kelly, a member of the Optimist club, told a club luncheon here.

Sask. Singers Chosen

REGINA.—Two Saskatchewan singers will appear in Melody Fair this summer at Toronto. They are Deltra Eamon, Biggar, and Jim Fullerton, Saskatoon, among the 12 singers chosen from 176 who auditioned for the summer theatre now preparing for a second season of musical comedy under a big tent in Toronto's Dufferin park. The show will run from June 23 to Sept. 23.

Elects First Overseer

CREIGHTON, Sask.—The largest village in Saskatchewan took shape here on April 4 when the recently elected three-man council was sworn to office by D. T. Grant, of the Saskatchewan department of municipal affairs. Fred Robinson, who topped the poll in the election, was the choice of the council for the position of overseer and conducted the first meeting of the new village following the swearing-in ceremonies.

Live Problem

WEYBURN, Sask.—A radio repairman who started probing into a "dead" radio here found it was full of life after all. As he took the radio out of the cabinet, out popped a huge mouse, very much alive, somehow or other, the mouse had crawled into the set and then was unable to get out. It chewed at various parts putting the set out of commission.

To Resume Operation

WINNIPEG BEACH, Man.—The Canadian Pacific railway's Moonlight train to this beach resort will be in operation again this summer, Acting Mayor J. W. Clarke told a meeting of council. A C.P.R. report, he said, stated the train would operate on Wednesdays, Fridays, and Saturdays and all holidays through the summer.

Premier Nominated

NEW WESTMINSTER, B.C.—Premier Byron Johnson was chosen unanimously to contest New Westminster riding for the Liberals in the coming provincial general election. It is expected it will be held about mid-June.

Gets Big Haul

VANCOUVER.—When Joe Clarke of nearby Lulu island wants food for his mink, he hangs on till he gets it. He was fishing for cod to use for feed on his mink farm when he hooked a 10-foot, 400-pound shark. The shark towed Clarke's small boat around for two hours before he was able to secure extra hooks and drag the critter ashore.

CHEESE CORNMEAL FINGERS

Mix and sift into bowl, 1½ c. once-sifted pastry flour (or 1½ c. once-sifted hard-wheat flour), 3 tps. Magic Baking Powder, ¾ tsp. salt. Cut in finely 3 tbs. chilled shortening and mix in ¾ c. yellow cornmeal, ¾ c. shredded cheese and 2 tbs. chopped parsley. Make a well in centre, pour in ¾ c. milk and mix lightly with a fork. Knead for 10 seconds on a lightly-floured board and roll out to ¼" thick rectangle; cut into 12 fingers and arrange, slightly apart, on greased baking sheet. Bake in hot oven, 425°, about 15 mins. Serve hot with butter or margarine. Yield 1 dozen fingers.

Level Land

Alex Hermann of Calgary is helping with the harvesting and seeding at John Leiskes.

Pastor Blair of Calgary was at Saturday night at the S.D.A. church to conduct a baptismal class.

Mr. and Mrs. Adam Roth of Calgary were visiting in the district over the weekend.

Mr. and Mrs. W.R. Suelzle of Combe are staying with their son, James, helping with the harvest and spring work.

Mr. and Mrs. Lawrence Triebwasser formerly of Acme are working for Sam Leiske of this district.

Mr. and Mrs. Courtney Gimbel of Peace River came back to this district last week to take off their 1951 crop.

Mr. and Mrs. Ed Kindopp of Calgary are at the home of their son, Melvin helping with the harvest and seeding operations.

Howard Gimbel of Canadian Union College stayed home after the Beisecker Concert to help with harvest and spring seeding.

The Cancer Drive will be delayed in this district due to the harvesting and seeding, but do not forget this urgent cause will need your support. John Leiske is in charge for this district.

Mrs. A. Herrman and Clifford and Mrs. E. Wutch, all from Calgary spent the weekend at the home of Mr. and Mrs. John Leiske.

TCA Aids the Flax Grower
One of the major factors limiting flax production in Western Canada is the inability of this crop to compete successfully against weeds.

The introduction of 2,4-D has played an important part in solving the weed problem in flax, but 2,4-D is only effective against certain susceptible broad-leaved weeds. In many flax fields, unfortunately, controlling the weed-leaved weeds with 2,4-D merely results in a more vigorous growth of the grass weeds, such as Green Foxtail (Pigeon Grass or Wild Millet). One of the newer chemicals, TCA (Trichloroacetic acid), is a valuable promoter for the control of Green Foxtail and certain other annual grass weeds in flax. TCA will not, however, control Wild Oats.

Effective in Flax. The recommendations of the 1951 North Central Weed Control Conference include this statement: "Three years' data have shown rather consistently that sodium and calcium TCA at rates of 5 to 8 pounds per acre will effectively control *Setaria* (foxtails) in flax when applied at early stages of growth without damaging flax. Best results are obtained when applications are made before the *Setaria* and flax are three inches high."

TCA and 2,4-D. Sodium TCA and 2,4-D can be mixed and applied as a single spray. This will control susceptible broad-leaved weeds and Green Foxtail at the same time. In mixing the spray, one gallon of water per pound of TCA is desirable. This may mean an increase in gallonage of water applied per acre over that normally used with 2,4-D alone.

Soil Moisture Important. TCA acts on the roots of the grass weeds. Therefore, it is necessary for the spray to move downward in the soil to the depth of the grass roots. If the soil is very dry, little of the TCA may reach the roots. The treatment, as a result, is not likely to be effective. On the other hand, if the soil is too moist, immediately following treatment, are likely to wash the TCA below the root zone, again with disappointing results. Thus, soil with good moisture content, plus the prospects of good weather for a few days, would seem important to successful treatment with TCA.

A few weeks ago the Level Land News showed where the Dorcas Society of this district had made one pair of pillow cases. This should have read 17 pairs for the Junior Red Cross Hospital.

Everyone in this district is beating the 40 hour week. Harvesting was going in full swing. In most cases harvesting and seeding are being done at the same time. It took only one week to fill all the elevators. Many of them were putting in as much as twenty hours a day.

CANCER

can be cured!

It's possible. It's probable. The big question is... In how many cases? Right now, with present medical knowledge, the number of cancer cures could be doubled.

But we need more dollars.... to spread information, to make more detection programs available, to assist doctors, and to aid laboratory workers in the great fight to find more cures for cancer.

We ask your help! There's no time like the present—there's no time to lose. Now is the time to GIVE TO THE CANCER CRUSADE. Give generously when your local canvasser calls or mail in your contribution.

Mail this coupon with your contribution to "CANCER".... 513-8th Ave. West, Calgary. I want to help the Cancer Crusade. Enclosed please find \$..... Name Address CANADIAN CANCER Society

FOR A LIFETIME, SECURE CAREER
"GO ACTIVE" IN CANADA'S ARMY

"There is a continuing need for a steady flow of good recruits to maintain expanded corps and units of the Canadian Army, both at home and overseas," Capt. Roy Jardine, Western Command Recruiting Officer, said on a periodic visit to Carbon last week.

Captain Jardine said the general response to special recruiting drives, particularly in the rural areas of Alberta, had been excellent. However, he pointed out that the Army now has more than 45,000 active force soldiers and that a large monthly intake is required to maintain this level and provide for rotation of troops abroad.

During the spring of this year the army will be bringing home several thousand troops who

have served one year in Korea. Similar rotation for troops now in Europe will take place next fall. To provide replacements for these men and ensure that no soldier is separated from his family for more than one year overseas, the army is seeking a regular flow of young men interested in a military career with a chance to serve in Europe or the Far East.

Vacancies exist in most all corps and trades of the Army. The greatest current need is for men in the Infantry where they may join such famous Alberta units as the P.P.C.L.I. or Loyal Edmonton Regiment. Applicants should enquire at the local Army Information Centre, Fred's Barber Shop, for complete details.

VERSATILE CHEESE

Cheese is one of those accommodating foods that will fit into many different types of cooking. Eaten as is, with bread, crackers or toast, or cooked with other ingredients in some savory fashion, it not only provides a taste treat but also supplies these proteins, minerals and vitamins that the body needs. One ounce of cheese gives as much food value as a glass of milk. It is equally good as a snack, a main dish or in lieu of dessert. In addition, cheese is one of Canada's important products.

A good way to start a fire.

Do you need a new fence?
